

MOMENT BAR BOX INSTALLATION GUIDELINES

1.

Check that the chosen dimensions of the Moment Bar Box correspond with the required concrete cover of the second concreting phase. Ensure that the End Cap (PE Foam) are in place at both ends of casing.

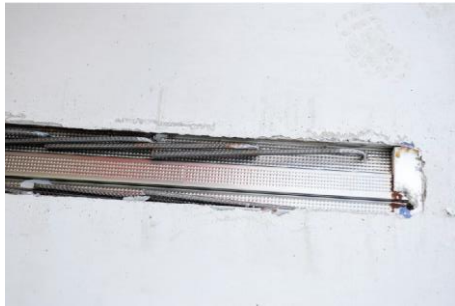

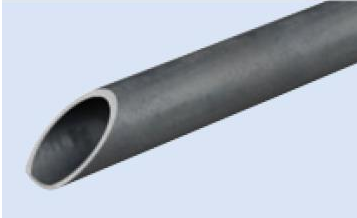

2

Fix the Moment Bar Box to the formwork and to the reinforcements as well if required.

* Please make sure there is no gap between Moment Bar Box and formwork.

3.	Cast the concrete in the first phase.	
4.	Remove the cardboard lid and the End Cap (PE Foam Insert) after removing the formwork.	
5.	Check that stirrups are completely clean	
	<p>Bend the bars out. It is advisable to use a bending tool to avoid distortion of a bayonet.</p> <ul style="list-style-type: none"> Bending tool made from 45 degree chamfered tube with an internal diameter just large enough to fit over the bars ribs.
